To whom it may concern:

Wise County began working closely with Southwest Architects in 2003. Jeff Heffelfinger and his company designed and built a state of the art Law Enforcement facility, as well as a remodel of our existing detention center in a very quick and professional way. As the planning process took place, Heffelfinger was always aware of our needs and concerns. After many meetings over plans, Southwest Architects, along with Dinosaur Valley construction, got our project off and running.

Through the construction process, Heffelfinger was in contact with our office on a daily basis. As new construction ended, we elected to use Jeff and his team to re-model our existing detention facility. Although this was not an easy take, Heffelfinger was able to complete all construction above board, as we are completely satisfied.

Southwest Architects (Jeff Heffelfinger), takes great pride in their work and I would recommend them to anyone.

Should you have any questions, or would like to tour our Law Enforcement Center, please feel free to contact me.

Respectfully

David Walker  
Sheriff
